DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 9-10 and claim 10, line 10, the phrase "differ in resolution with said color features of said input digital image" is ambiguous (as written, it could mean either "differ in resolution from said color features of said input digital image" or "differ in resolution in accordance with said color features of said input digital image").

Allowable Subject Matter

3. Claims 1-15, insofar as they are understood, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

4. Claims 16-21 are allowed.

Art Unit: 2624

5. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 1, 10, & 16 (and dependent claims 2-9, 11-15, & 17-21), the art of record does not teach or suggest the recited elements of conversion of color image features to binary image form, changing of the pixel resolution of the binary image, and selectively inserting colors into the pixels of the resulting binary image.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamagata et al discloses (Figure 1, items 108 & 109) an arrangement in which a color image is converted to binary data and then subjected to resolution conversion in binary form. The resulting binary image is used to generate an output color image; however, the association of color with pixels is non-selective.
